

Job Title: Software QA Tester

Reports to: Director of Development

Location: Toronto, Ontario

Type: Permanent, Full-Time

Software QA Tester:

The CLIENT is an innovative cloud-based asset management solution for the renewable energy projects. As an integral member of our development team, the Report Developer is responsible for the design, development, implementation and support of reports for the CLIENT SaaS application. Working with cross-functional teams, you will participate in gathering and documenting reporting requirements to meet business needs. Using your skills and experience Report Developer, you will then use those requirements to design, develop, test and implement reports and dashboards that utilize the underlying data store(s).

Responsibilities:

- Plan, Estimate, Prepare and Execute Test Cases and Test Scripts to ensure the quality deliverables.
- Write and maintain automated tests (C#. Net and Telerik Test Studio) to support regression and health check testing
- Identify test requirements from specifications, map test case requirements and design test coverage plan.
- Backend database testing in Microsoft SQL environment
- Execute and evaluate manual or automated test cases and report test results.
- Ensure that validated deliverables meet functional and design specifications and requirements.
- Isolate, replicate, and report defects and verify defect fixes.

Required Qualifications:

- Minimum 3+ years of experience in Software Testing /Software Quality Assurance for web-based applications Proficiency with Telerik Reporting or any similar product suite.
- Clear Understanding and Solid knowledge on QA concepts, methodologies and testing techniques (black box, white box, functional, smoke, regression, integration, unit, acceptance testing)
- Well versed in both manual and automated testing
- Hands on experience in software test automation tools (Selenium, Test Studio etc.)
- Experience in coding automated tests using some programming language (Java, C#) and test APIs like selenium webdriver, Telerik testing framework preferred
- A strong background in developing test plans, test cases and test scripts.
- Having Sound knowledge on SQL and Database testing
- Good Understanding on Programming Fundamentals and Object Oriented Programming (.Net/Java preferred)
- Experience with Agile and Scrum methodologies
- Strong sense of ownership, passion and dedication towards Software Testing and Quality Assurance
- Experience in web Technologies, HTML, XML, XPath, JavaScript
